

Net Anchors – *How to Use*

On all 3 Terra-Cotta turf fields, as a City mandated security feature, the nets **MUST** be anchored into position. The anchoring of the nets should be completed by coaches, staff or anyone under the direct supervision of an adult. The following outlines the use of the anchoring system.

- 1- Each net, whether it be for 11v11, 9v9, or 7v7, will have 2 cables attaching it to the anchor, one on each end of the back bottom bar.

- 2- The cable must go through the anchor in the ground, around the bar and both ends of the cable are then tied together with a carabiner.

Net Anchors – *How to Use*

- 3- On TC1 and TC2, when the 7v7 nets are stored away in their alcove, the cables and carabiners are to be left attached to the anchor.

- 4- On TC3, the same nets are used for 11v11 games as well as 9v9 games, in either position, the nets must be anchored.
- a. When the nets are in their 11v11 position, the 9v9 cables and carabiners are to be kept on the fence behind the nets.

- b. When the nets are in their 9v9 position, the 11v11 cables and carabiners are to be left attached to the anchor.
